

DeFi Options DAO

Decentralized
Options Exchange

on  polygon

Why Options?

Limit losses

Options present an alternative over stop orders, while keeping independence of underlying asset.

Leverage

Because options are much cheaper to purchase in comparison to the underlying asset, you can purchase more and get more upside potential.

Strategies

Options allow us the flexibility to come up with many strategies that both limit risk and maximize return.

Yield

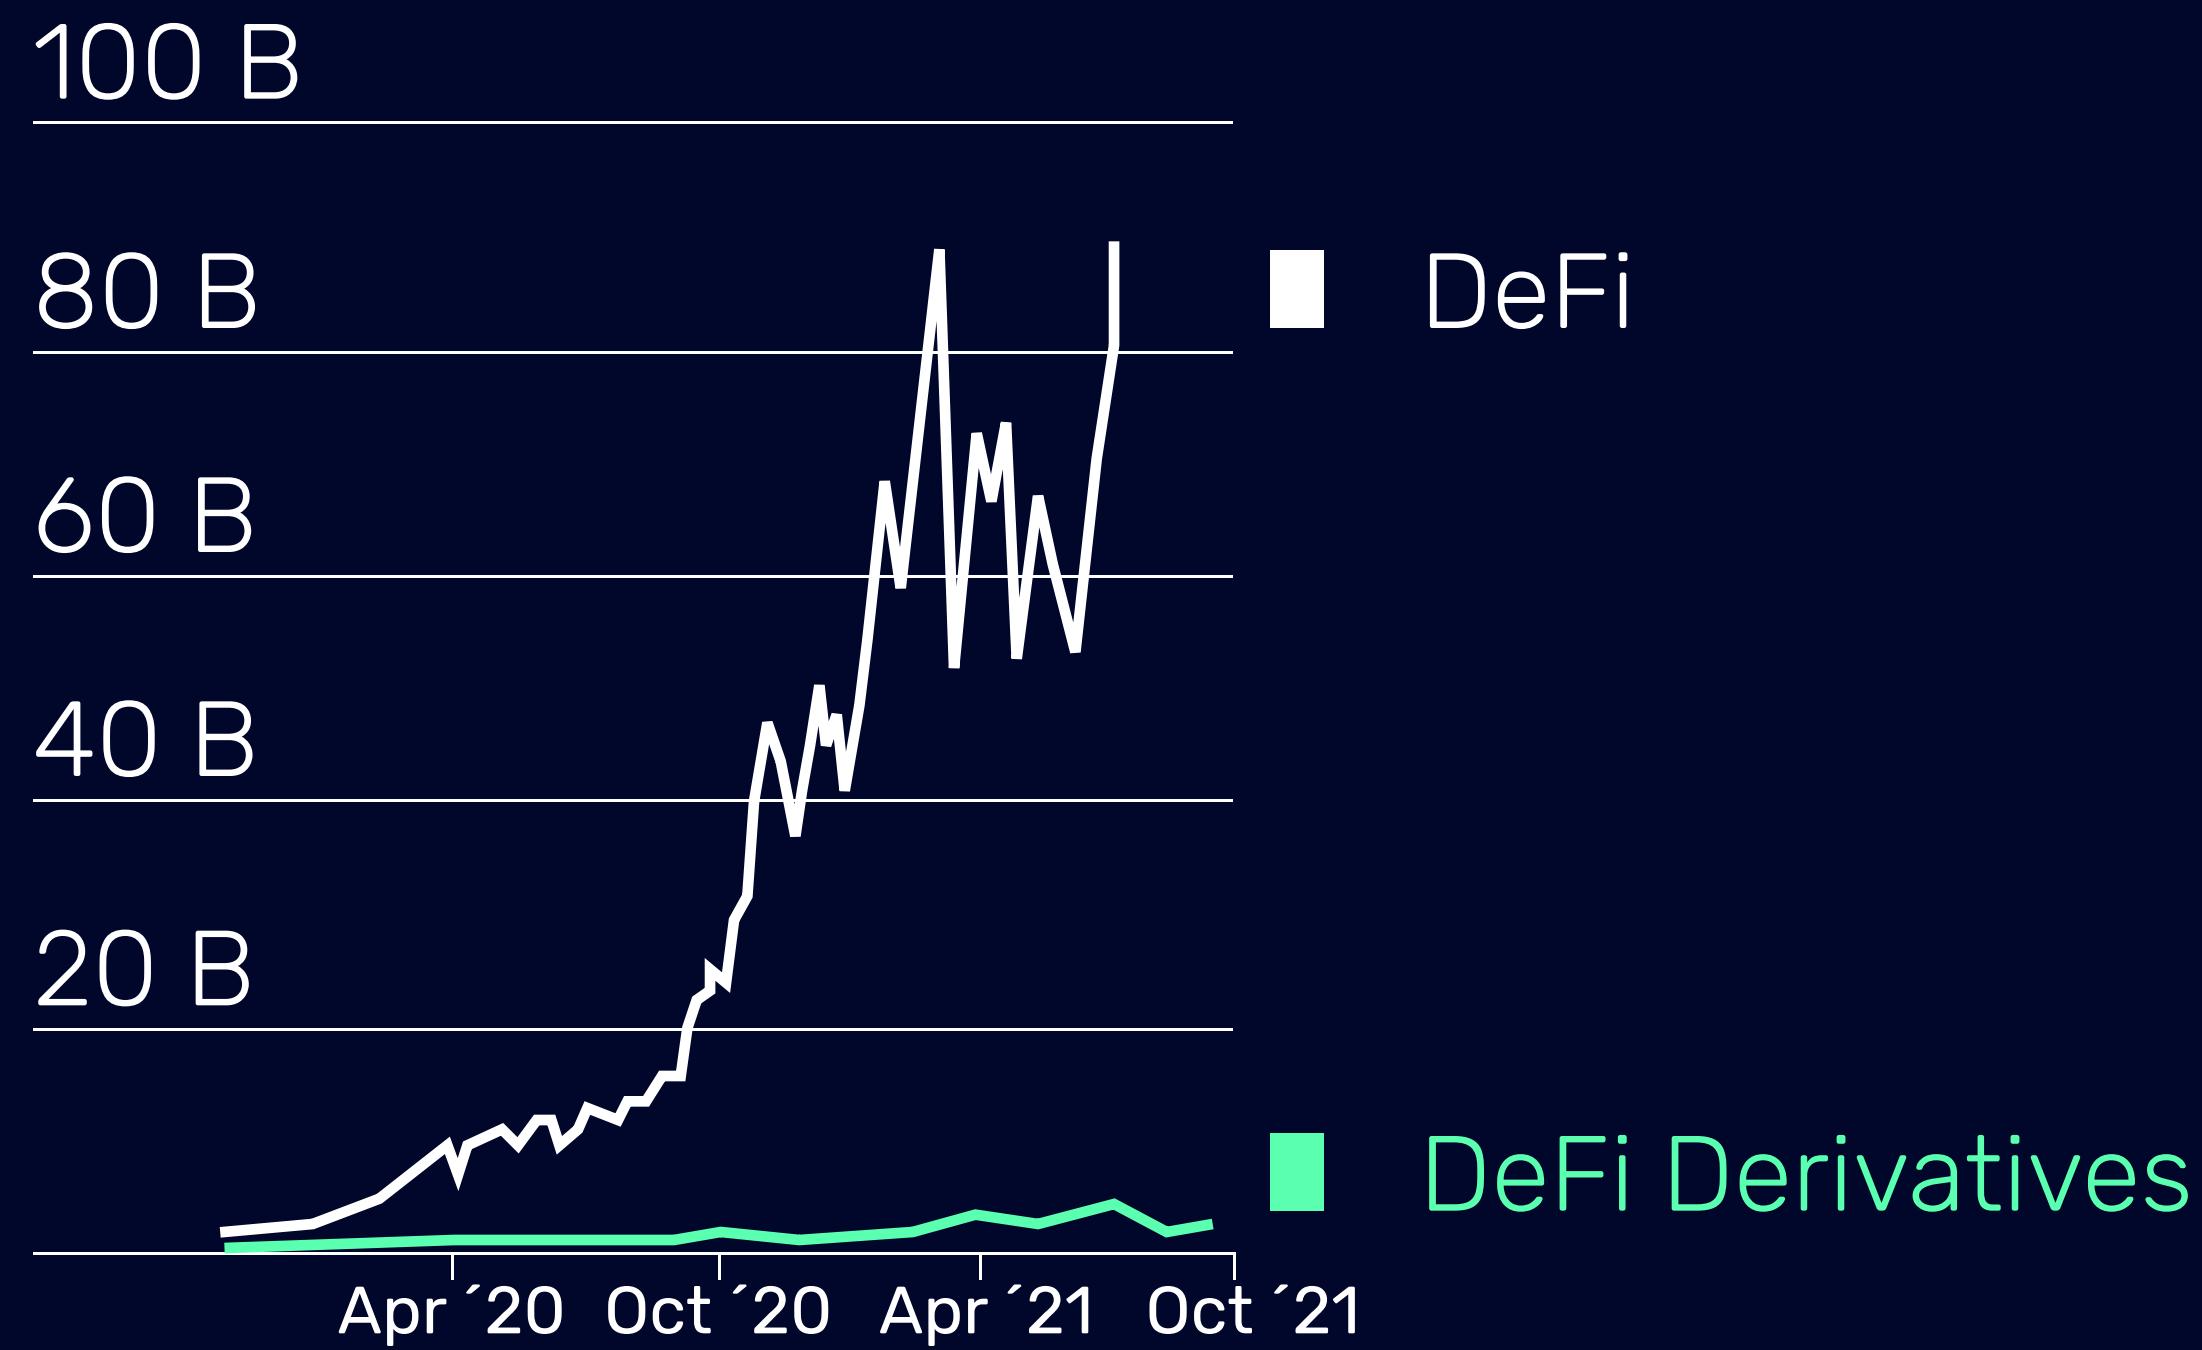

Providing liquidity in stablecoin based pool allows diversification of capital allocation, exposing users to significantly lower risk than writing an actual option.

Locked (USD) in Derivatives

Options on TradFi:
Cumulative growth rate of trading volumes

Sources: Annual equity options contract volume (Options Clearing
Corp.); Consolidated average daily trading volume of all stocks
(New York Stock Exchange)

DeFi Options DAO

Barriers to Mass Adoption

For traders:

- Inefficient pricing models
- Slow and expensive Ethereum main net
- Low coverage of underlying assets (existing options protocols mostly support only BTC and ETH as underlying assets)

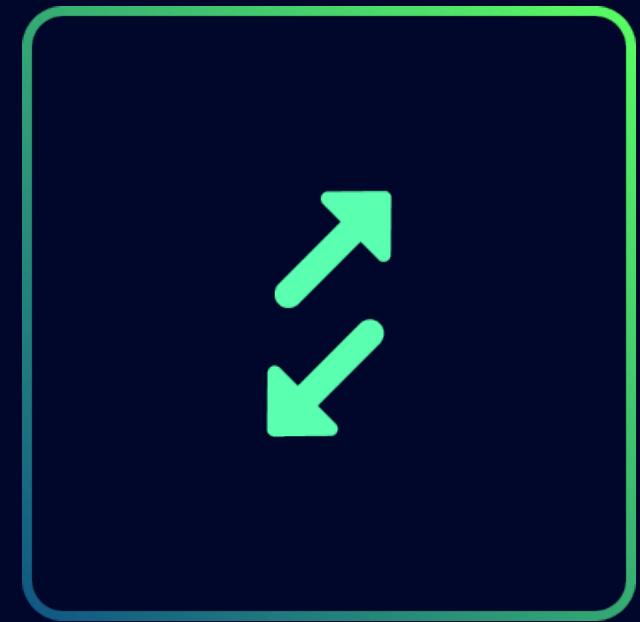

For liquidity providers:

- Volatility and impermanent loss risk
- Pool APY volatility and low incentives for liquidity pools providers
- Control of pricing models and the risk of LP is controlled by a centralised team, or hardcoded into a contract

DeFi Options DAO

Why DeFi Options DAO?

Efficient Option Prices

Our flexible pricing model will allow traders to get DeFi options at the most efficient prices on the market.

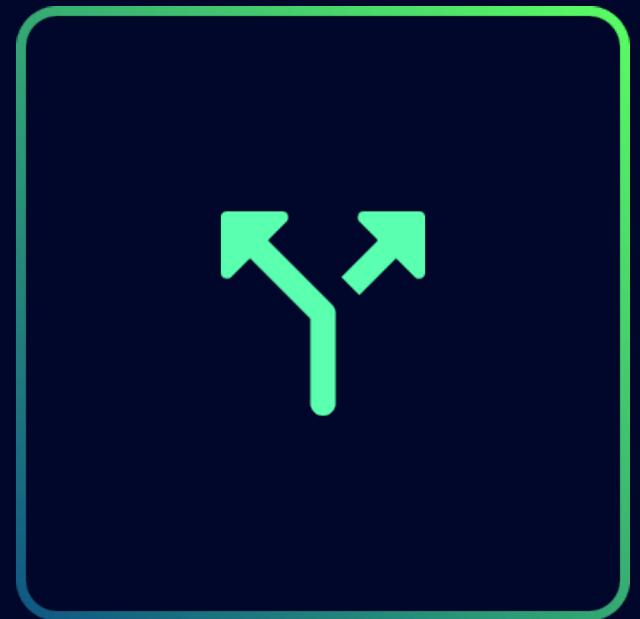

Scalability & Flexibility

DeFi Options DAO is going to support buying put and call options for a wide range of underlying assets selected and approved by the DAO.

DeFi Options DAO

Why DeFi Options DAO?

Stablecoin Pool

Provide liquidity in stablecoins to mitigate impermanent loss and start earning stablecoin based yield in any market condition.

Stablecoin Settled Calls & Puts

Buy, sell and earn profits in stablecoins. Stablecoins allow simplicity, and remove volatility risk for users.

DeFi Options DAO

We are a community - not a company.

Non-custodial

Users of DeFi Options DAO have full ownership of their funds at all times.

Decentralised

All users play a part in shaping the future of the platform.

DeFi Options DAO

Security

Security is our top priority.

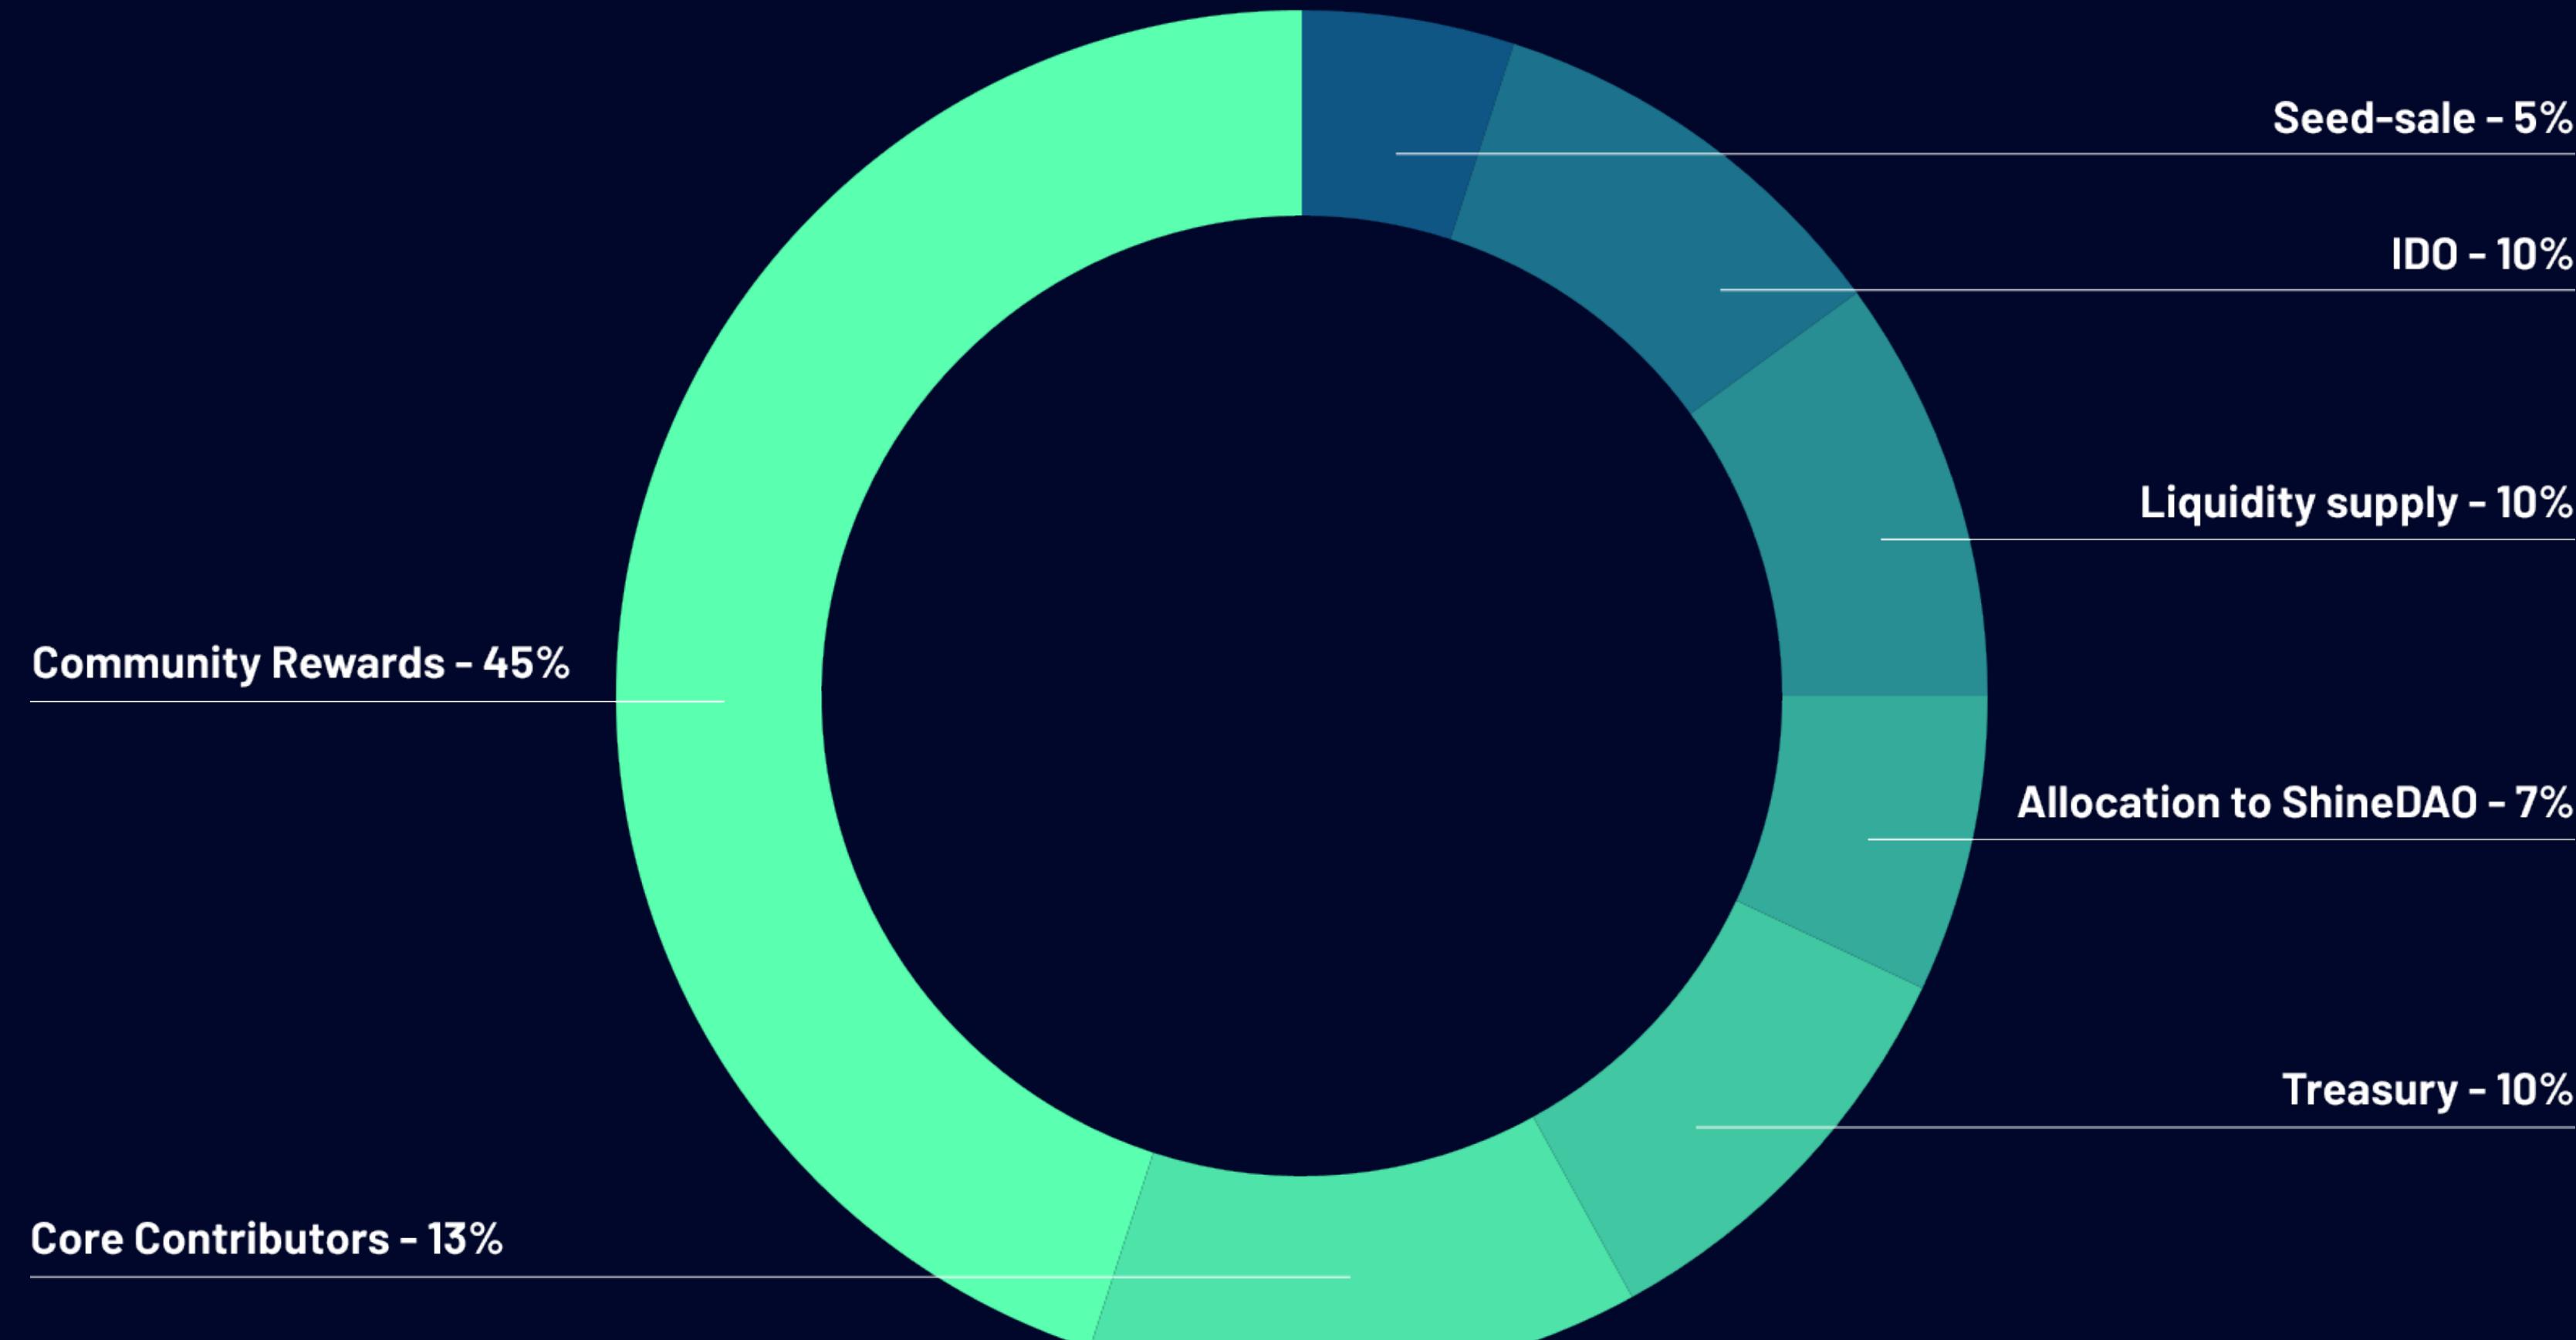

DeFi Options DAO is currently being scheduled at PeckShield.

The main reason for seed sale is to ensure we can afford top notch audit.
